### ULTRA CENTER - THE FOUNDATION FOR HIGH-END HOME THEATERS

The Ultra Center anchors the front stage and immerses the listener in the cinema experience, effortlessly handling the most complex and dialogue-intensive scenes with stunning realism, room-filling presence and outstanding vocal reproduction and dialogue intelligibility. Available in premium-grade piano gloss black and real black oak veneer finishes and handsomely styled with a swept back profile and striking edge treatments, the Ultra Center will complement any high-end home theater.

### DRAMATIC STYLING YIELDS SONIC BENEFITS

The Ultra Center cabinet design yields numerous sonic benefits. The non-parallel cabinet panels reduce standing waves within the cabinet, effectively eliminating frequency response coloration. The wedge-shaped front baffle and flush-mounted drivers reduce edge diffraction and improved on-axis high frequency response. Even the grille design is FEA-optimized to maximize acoustic transparency.
