

## ULTRASONE PRO 900i

Šifra: 14968  
Kategorija proizvoda: Studijske Slušalice  
Proizvođač: ULTRASONE

**Cena: 239,00 EUR**

### ULTRASONE PRO 900i

**Pravo odbijanja i povrata za ovaj proizvod ne vrijedi, budući da proizvod spada u pravne iznimke prema čl. 16 Direktive 2011/83/EU Europskog parlamenta i Vijeća od 25. 10. 2011. - isporuka zapečaćene robe koja je otpečaćena nakon isporuke i ne može se vratiti zbog razloga vezanih za higijenu ili zaštitu zdravlja.**

The S-Logic Plus technology is at the core of the listening experience offered by these headphones. It delivers a spacious and natural sound with a wide frequency range, and it generates lower sound-pressure level than traditional headphones while achieving the same perceived loudness. This can potentially reduce hearing damage and facilitate fatigue-free listening. Incorporating components developed for Ultrasones's flagship Edition series, the acoustically redesigned earcups and their tonal fine-tuning aim to achieve a sound free of coloration, ideal for monitoring, engineering, and mastering.

Other features include ULE technology, which utilizes MU metal shielding to protect listeners from the potential effects of low-frequency radiation generated by headphone drivers. The headphones come with a detachable straight cable and a 1/4" adapter. A hard-shell transport case and a second pair of earpads are also included.

**Pro-Quality Sound**

Designed with audio professionals in mind, the 40mm titanium-plated drivers provide precise sound reproduction ideal for monitoring reference. In addition, S-Logic Plus technology delivers a spacious and natural sound with a wide frequency range of 6 Hz to 42 kHz and authentic rendition of voices and instruments.

## **Safer Listening**

S-Logic Plus technology utilizes a decentralized driver to send music around the ear, not just into it. The sound is projected onto the surface of the outer ear rather than the inner ear directly, providing the same loudness sensation as other headphones but with a reduction of sound pressure level by up to 40% (3-4 dB). This may reduce the risk of hearing damage and contributes to fatigue-free listening. The earcups' MU metal shielding reduces electromagnetic fields by up to 98%, protecting listeners from the potentially harmful effects of low-frequency radiation generated by headphone drivers.

## **Detachable Cable and 1/4" Adapter**

A detachable straight cable is included: One short 4.9' ultrasoft straight cable (USC) and a gold-plated 3.5mm to 1/4" adapter.
