What's more, pressing a key combination changes the Octave and Transpose buttons' function to send out MMC transport functions. So, you can activate Start, Stop, and Record directly from your keyboard. Custom MIDI assignments can be made to the MIDI fader, modulation wheel, and footswitch pedal. The changes are stored, so the next time you power up, you can pick up where you left off. There is direct support for most major DAWs including Bitwig, Cubase, Garageband, Logic, Nuendo, Digital Performer, Mixcraft, Reason, Reaper, Sonar, and Studio One.
