feet.

Big Sound for Small Spaces

CR StealthBar is the ultimate desktop audio system when you're low on space. It fits perfectly under your computer monitor and stays out of the way without sacrificing sound quality. It's great for gaming, music, and more.

Studio Inspired

Like the rest of the CR Series, StealthBar shares a legendary Mackie acoustic design and tuning pedigree. Experience crisp highs, clear midrange, and punchy bass.

Wired or Wireless?

CR StealthBar offers a handful of ways to get connected. Get digital with USB, go wireless and pair it via Bluetooth®, or connect to the headphone output of any device.

Your Sound, Just the Way You Like it

Featuring 3 tone presets, Music, Movie, and Game, that enhance the sound in unique ways—you can tailor CR StealthBar to sound perfect for you with the push of a button.

Quick Control

Blasting some embarrassing music when your friend walks in? Hit the convenient Mute button on the side, or do a smooth fadeout with the front panel volume control.

Perfect Fit

CR StealthBar includes an extra set of taller feet, so it can sit neatly above just about any monitor stand. This also ensures any cables you may have can run under CR StealthBar.

MACKIE CR StealthBar (komad) - soundbar PC The CR-

Stealth features three tone presets (Music, Movie, Game), which allows you to tailor the sound at the touch of a button. The integrated USB sound card allows you to record and playback music, while the integrated Bluetooth receiver provides wireless audio from any compatible streaming device. There is a 3.5mm input and output as well as a 3.5mm headphone output on the front of the speaker, which mutes the sound for quiet enjoyment. The CR StealthBar makes it easy to tuck it under your monitor and route cables with its height adjustable
