Transparent System Limiting and Protection

Dedicated processing module monitors and protects the amplifier in real time
Sound quality and tonal balance is maintained even under heavy limiting
Utilizing powerful multi-band compression, the amplifier can target specific frequency ranges to prevent the system from being overloaded rather than turn everything down at the expense of overall output
Input limiting keeps your source signal in check so if you’re sending audio that’s a bit too hot, the speaker will cool it down
Universal Power Supply (100-240VAC) with Power Factor Correction for stable operation even with unstable AC power
