

Fluid Audio DS8

Šifra: 12117
Kategorija proizvoda: Studijska oprema i pribor
Proizvođač: Fluid Audio

Cena: **69,00** EUR

Elevating your monitors closer to ear-level means you get better on-axis response. As the high frequencies coming from tweeters can be somewhat directional (or “beamy”), getting them up and closer to ear level means you hear a more full-frequency response.

Made from MDF wood (the same material as your monitor enclosures) they are rugged and acoustically well damped. The stand “posts” are made with polypropylene, minimizing the “ringing” sound of ABS plastic. Both top and bottom of the stands are capped off with extremely absorbent, 40 durometer rubber feet. The result of the stand construction allows your monitors to “breathe” and to produce much purer tones and a less distorted midrange.

Package Contents

- 4 x 3” stand “posts”
- 4 x 6” stand “posts”
- 4 x middle stabilizers
- 10 rubber feet (10mm)
- 5 rubber feet (18mm)
- 10 screws (for mounting posts)

Features

- Fits most 6” to 8” studio monitors
- Allows for 2 height adjustments: 3” and 6”
- Allows for 3 angle adjustments: Flat, 3 deg and 6 deg

Specifications/Material

Middle stabilizers: Vinyl-laminated MDF

Stands: Polypropylene plastic

Rubber: Highly absorbent, 40 Durometer

Size (packed): 8.46 x 8.93 x 4.9"

Max load 13kg per unit

Weight: 1.46kgs/giftbox

Measures

Total Depth: 221.5mm

Distance between front and rear rubber support:
180mm

Total Width: 206mm

Distance between left and right rubber support: 150mm
