The SW-450 subwoofer uncovers what you've been missing in your music movies and video games -- clean chest-thumping bass. It's an ideal companion for many of our front center and surround speakers, whether you're looking to achieve a 5.1 system or a 5.1 on the Richter scale.

Powerful 10-inch driver offers increased bass response with low distortion

Built-in Class D amplifier delivers 450 booming watts of dynamic power

Sleek modern design complements today's HDTVs

Works perfectly with many speakers in the Klipsch line

Great sound begins with a great bottom end. The SW-450 subwoofer delivers the two lowest octaves of the ten humans can hear intensifying your listening and viewing experiences.

The SW-450 fills any room with big clear bass thanks to its powerful 10-inch driver and Class D amplifier. But if you really want to experience what this hard-hitter can do be sure to place it in the corner of your room. In general placing a subwoofer along the middle of the wall or out in the room will decrease its output.

In addition to its unparalleled performance the SW-450 offers unmatched flexibility. A low pass crossover and variable phase control lets you effectively blend the subwoofer's low-frequency tones with other Klipsch speakers as well as establish a level of bass that's just right for your room.

The SW-450 subwoofer is truly the way to go if you want to hear—and feel—your stereo or home theater entertainment.

Reviews & Awards

HomeTheaterReview.com (April, 2010)

"The SW-450 offers the classic Klipsch value proposition - great build quality, dynamic, aggressive performance, affordable price. It's not the most refined subwoofer sonically but, at the same time, it kills on movie and gaming material, offers some really convenient features, and is really affordable. For those - and there are many - looking for a subwoofer like this, the SW-450 is a must audition."

it is realy powerful sub. i love it !!!!!!!!!!!!!!!!!!!!!!!

by **VisionTouch** on Feb 23rd 2011 05:03

I have never wrote a review before on speakers and this made me write one today/tonight, first time and nothing but "WOW AMAZING SUB-WOOFER" (a jaw dropper). I fell inlove with this speaker when I first heard it on Tiger Direct showroom. It was the lower model brother it's kind (the SW-350). The SW-350 was playing on a LCD TV during x-mas time and I said to my self, "what kind of sub is that? being from a distance and huge show room store, I said that's sound great, it does produce a low-lower bass that you can hear "UNBELIEVABLE". I decided to buy this model (SW-450) because of the higher wattage. Again, I thank you Klipsch for a great product, I am very pleased and happy with this purchase, it is worth every penny, Great on music and movies, it's a bundle of sounds. Thank you!
