NEKTAR Impact LX49+- MIDI klavijatura

Šifra: 11621
Kategorija prozivoda: Midi klavijature i kontroleri
Proizvođač: Nektar

Cena: 139,00 EUR

IMPACT LX+ CONTROLLER KEYBOARD

The 49 or 61 note velocity sensitive keyboard is a synth action with a medium tension. The full-size, piano-style keys are covered to protect against dirt and dust while also complementing the Impact LX+ design. With 4 velocity curves gradually increasing in dynamics there is a choice for any playing style. If you don't need velocity, 3 fixed velocity levels cater for a consistent output. Octave and transpose buttons as well as pitch bend and modulation wheels are within reach, so you can quickly shift the keyboard up or down as needed, or apply additional articulation with the wheels.

OCTAVE & TRANSPOSE BUTTONS

There is more to the 4 Octave & Transpose buttons than meets the eye. 4 functions are selectable on the fly so you can make important changes at any time, even while you play. A key combination makes assignment quick and easy. Choices include sending out MIDI Program Messages, change the Global MIDI Channel or select any of Impact LX+'s 5 user presets with either the Octave or Transpose buttons

CONTROL CENTER

Nine 30mm faders, 9 MIDI buttons and 8 encoders are at the center of Impact LX+'s control panel. Each control is fully programmable to send any MIDI CC message for use with hardware or software MIDI products. Used with Nektar DAW integration, the controls take on a life of their own, providing flexible pre-mapped DAW control giving you the best of both worlds. Control settings can be stored in any of the 5 Impact LX+ presets for recall at any time. And if you switch Null on, any parameter values are stored when you change presets so you avoid parameter jumping.

CONTROL CENTER

Nine 30mm faders, 9 MIDI buttons and 8 encoders are at the center of Impact LX+'s control panel. Each control is fully programmable to send any MIDI CC message for use with hardware or software MIDI products. And if you switch Null on, any parameter values are stored when you change presets so you avoid parameter jumping.

PADS

For groove and beat creation, Impact LX'+s 8 velocity sensitive pads make life easy. Calibrated to trigger at a light touch, finger drumming is suddenly well within reach with a nice and even velocity response. Each pad can be assigned any MIDI note number or MIDI cc message for use as MIDI trigger or toggle buttons. But the best part is the "Pad Learn“ feature, which allows you to just select a pad, play the note or drum sound you want on the keyboard and assignment is done. No complex menus for a task that's essential to getting the most out of your pads. Assignments are stored over power cycling so you don't lose your settings when you switch your system off for the night. In addition, 4 pad map locations can store your settings for future recall.

The 4 color LED illumination not only looks good but also indicate which pad map is currently loaded and can even tell you which type of MIDI message each pad sends. With Nektar DAW Integration, the pads are automatically mapped in for example Reason and Bitwig.. The two Clips and Scenes buttons are used in Bitwig to trigger...., Clips and Scenes. In Reason, a clever control of Reason's location points create a similar experience with scenes triggering of any Reason song.

Cene su informativnog karaktera. Prodavac ne odgovara za tačnost cena iskazanih na sajtu, zadržava pravo izmena cena. Ponudu za ostale artikle, informacije o stanju lagera i aktuelnim cenama možete dobiti na upit. Plaćanje se isključivo vrši virmanski - bezgotovinski.
